

1. INTRODUCTION

Mining has never been more cost prohibitive for the average person, yet is also more lucrative and complicated than ever.

Since the launch for the bitcoin era in 2011, Individuals have been shut out of the game while large corporation capture all of the profits and destroy the environment. \$MCG is here to change that. We are creating together as environmentally friendly crypto mining company powered by solar power, hydro power, etc.

We are coming together as a crypto mining community which will be having Expertise in crypto mining to save power and mine crypto in efficient way using various technique.

Miners Coin Global (\$MCG) is a utility token for the crypto community, powered by Binance Smart Chain (BSC). In which Normal People Buy the \$MCG token Enjoy the ups and down of market price as well as stake the coin and earn passively.

Also, Token will be used for support payment system, where our team help other miners to fix and run the mining rig efficiently and provide world class remote support to all miners

Miners Coin Global (\$MCG) team will provide the world class engineer working on your invested mining rig remotely, user just have to Stake the token on the Website and Rest.

Rest of all configuration and setup infrastructure will be Prepared and run by \$MCG team.

We plan to creating the world largest community which with Enjoy the mining profits without having any mining infrastructure.
